

ALEX MAH

PROGRAMMER

PROFILE

I'm a game programmer specializing in Unreal Engine and Unity with an interest in Shaders and VFX after experimenting with it in Game Jams and experiencing its versatility.

I enjoy understanding game design and logical reasoning for each system.

EXPERIENCE

Streamline Studios

Gameplay Programmer

01/2025 - Present

Upin & Ipin Universe

- Refined core systems and features to meet project goals and design intent.
- Troubleshoot and resolved critical gameplay and stability issues that impeded production/shipping.
- Ensured smooth porting and functionality across multiple platforms. (PC, Consoles)
- Integrated and implemented Steam platform features.
- Identified and proposed solutions to UI/UX inconsistencies and design flaws.
- Contributed technical and design input in reviews to validate gameplay UX.

Unannounced Project

- Contributed to early design discussions in finding the unique selling points.
- Researched and evaluated technical approaches for implementing core systems.
- Led technical prototyping and architectural planning for core systems defined.

Aeonsparx Interactive

Internship

03/2024 - 5/2024

- Onboarded and developed with Unreal Engine 5 (Blueprint, C++).
- Learned and implemented GAS features within existing codebase.
- Onboarded and worked with existing codebase to create user interface for production.
- Internalized and applied practices that allow for scalability and maintainability for production.
